Subject EPA - Park City, Utah - Contaminants

To:

Kathryn Hernandez
John Dalton
Muhammad Slam
Dave Allison

From:

Braden Danner

I have been considering buying property and moving my family to Park City, Utah. After researching the area online, I discovered that contaminants from the Richardson Flat Tailings (i.e. arsenic, mercury, lead, etc.) have affected ground water, surface water and the air in the region as noted in the following web documentation:

<http://www.epa.gov/region8/superfund/ut/richardsonflat/index.html>

Please supply me with any information pertaining to hazards, contaminants, toxins or pollution that may affect living in or near Park City, Utah area so that I might make the right decision for my family.

Also, if possible, I would be very interested in any information you might provide to to help me discover what regions in the U.S.A. have the cleanest air and water, and have the least pollution, toxic or hazardous waste, and the best sanitation. I would very much like to provide the cleanest and healthiest environment for my family and me.

Sincerely,

Braden Danner
